

Industrial Painter / Blaster

Synergies, LLC

Industrial Blaster/Painter

Job Description

Well established steel fabrication company is looking for an experienced Blaster/Industrial Painter to join our bustling coatings division. This position will be responsible for both roles in the coatings process, and their placement for the workday, whether in the blasting booth or paint booth, will be project dependent.

****Please note, automotive painters and house painters skills do not match for the skill requirement of this position.****

Requirements

- Must have Sandblasting experience. Industrial Painting experience is preferred, however will train the right individual.
- Painting experience would include: operating and maintaining Graco airless pumps, pressure pots, electro-static painters, lines and paint guns; knowledge of measuring surface blast profile and wet and dry film thicknesses; experience working with Alkyds, Zinc's, Epoxy, 2 part Urethanes and Water Base Coatings.
- Additional responsibilities include assisting in the preparation of parts and loading and unloading of paint booth.
- Ideal candidate will be energetic, have a great work ethic and ability to work at a fast pace.
- Steel Toed Boots and a Pre-employment drug screen are mandatory.

Job Type: Full-time

Mon-Fri 7:00am-3:30am. This is a full-time 1st shift position, but must be flexible to work overtime when needed depending on project demands.

There are great benefits available, including medical insurance, vacation pay and 401K.
